

## A FULLY INTEGRATED TEST PROCESS

### THE AGILE TESTER'S IDE

YEST® provides comprehensive support to Agile Testers regarding test design, implementation and maintenance using visual test design. Test cases and datasets are generated automatically.

### THE COLLABORATION PLATFORM

YEST® implements a Visual ATDD approach. It is fully synchronized with Jira®, making testing activities transparent to all project members. using **Yest for Jira**®

### THE CUTTING EDGE TEST MANAGEMENT

YEST® automatically generates test cases in Xray® and links them to Jira® issues. Those test cases are then planned, executed and documented as usual.

### A BRIDGE TO TEST AUTOMATION

YEST® fosters automation-friendly test design and enables manual testers to participate in automation activities.

### LIVING DOCUMENTATION

YEST® provides truly living documentation in Jira®, comparable to clean code practices. Changes can be integrated with few effort.

### PROVEN PRODUCTIVITY GAINS WITH YEST®

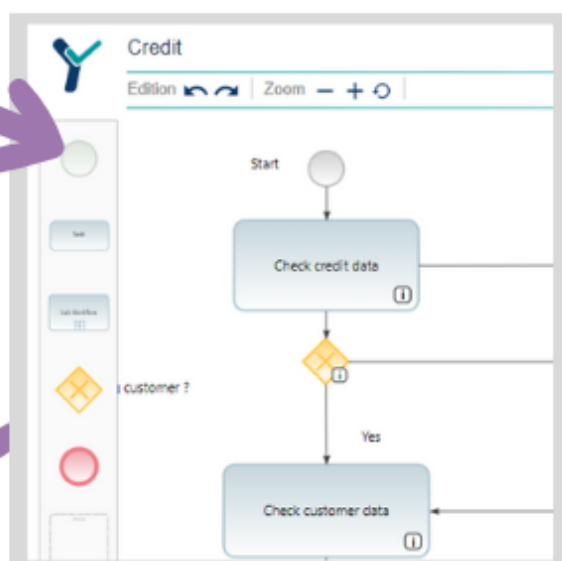

30% during test design  
50% during test case maintenance

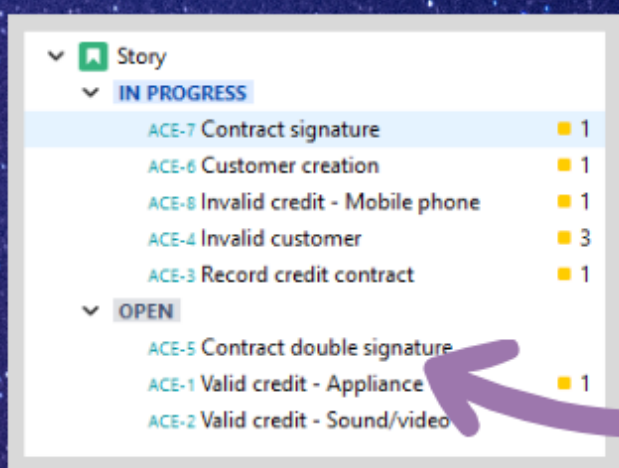

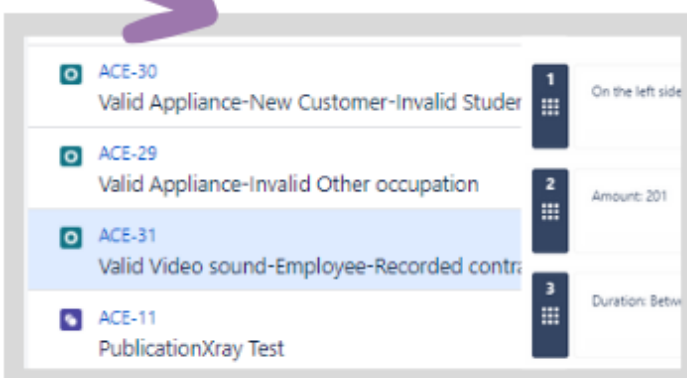

Full synchronization between Yest® and Jira® with partial editing functionality in Yest® for Jira

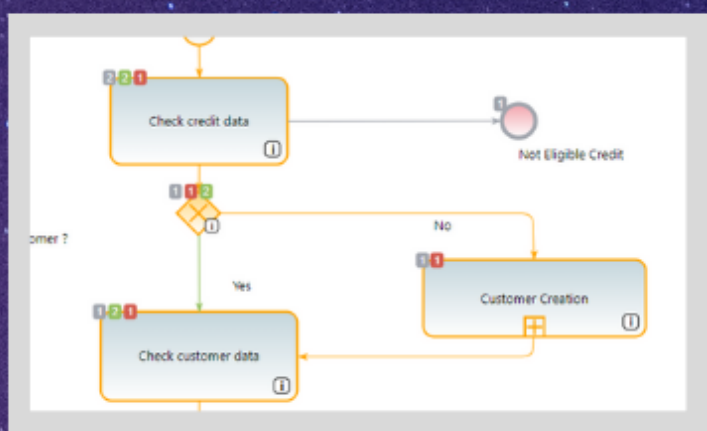

Import of Jira® issues for drag & drop traceability in YEST® Enterprise.

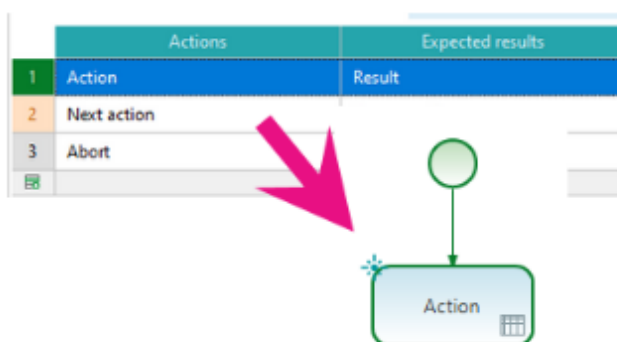

Configurable publication of test cases, test sets and data via API.  
Configurable traceability of test cases to Jira® issues.

Visualization of Xray® execution results in YEST® for Jira

Scenario creation from legacy test cases using drag & drop
